

Lombardi Center Awards

From: The Annual Report of the Lombardi Program on Measuring University Performance

<http://thecenter.ufl.edu/index.html>

An indicator of faculty competitiveness comes from election to prestigious national academies and the high-level national awards faculty win in competition with their colleagues. National Academy Memberships often reflect a lifetime of achievement; most national-level faculty awards reflect recent accomplishments. In addition, the process of selection for National Academies is substantially different from that used for faculty awards. Even more importantly here, these indicators provide a way to capture the competitiveness of faculty not in the sciences or other federally funded areas of research. Humanities and the fine arts, for example, appear reflected in the list of faculty awards included in these indicators.

National Academy Members: <http://www.nationalacademies.org/directories/>
National Academy of Sciences

National Academy of Engineering

Institute of Medicine

National Research Council

Koshland Science Museum

Faculty Awards: http://thecenter.ufl.edu/data_link_2003.html

Art and Humanities

American Council of Learned Societies

Fulbright

Getty

Guggenheim

National Endowment for the Humanities

National Humanities Center

Newberry Library

Woodrow Wilson Center

Science, Engineering and Health

Beckman Foundation Young Investigator Award

Burroughs-Wellcome Career Awards in the Biomedical Sciences

Cottrell Scholars

Howard Hughes Medical Institute Investigators

Lasker Medical Research Awards

MacArthur Foundation Fellowships

Mellon Foundation Distinguished Achievement Awards

National Medal of Science

National Medal of Technology
NIH MERIT (R37) and Outstanding Investigator (R35) Awards
NSF Career Awards
PEW Scholars in Biomedicine
Presidential Early Career Awards for Scientists and Engineers
Robert Wood Johnson Health Policy Fellowships
Searle Scholars
Sloan Fellowships
U.S. Secretary of Agriculture Honor Awards
