

Restoration Ecology

3100:495/695 Mon- 1:15- 5 (Lab) & Wed- 1:15-2:30

The Cuyahoga Valley is an important touchstone in the national discussion of how damaged ecosystems can be restored. With Akron in the center of that valley, it is only fitting that UA students should participate actively in his topic. In this unclass an interdisciplinary team of students from Biology, Geology, Environmental Sciences, and related disciplines will work with academics and restoration professionals. Along with classroom learning, these students will be working hands-on to both monitor and maintain existing urban restorations (Haley's Run), and to plan and evaluate new restoration (Adam's Run).

Dr. Randy Mitchell (Biology) and community collaborators

These are small, interdisciplinary, problem-centered, hands-on courses! All are 3 credit courses. Students may enroll under the course number listed or work with Dr. Behrman at EXL to seek Independent Study or other pathways to credit in another department. behrman@uakron.edu
