

# MENUS AND MANUSCRIPTS AT HOWER HOUSE

## Digital Projects in the Archives

In this hands-on course, we'll explore the central role that food, cooking, and entertaining played at the Hower House in the early twentieth century. We'll use tools like blogs, websites, digital archives, and Instagram feeds to bring archival research to new audiences, and we'll prepare a cookbook for print publication to showcase the Hower family's recipes. In the process, we'll learn not just about the era's food and parties but about the wide array of people involved in their production. No special experience with digital tools required.
