***Did you know...that tobacco smoke contains a deadly mix of more than 7,000 chemicals? (CDC)***

Tobacco addiction is a chronic disease that often requires multiple attempts to quit. Although some users are able to quit without help, many others need assistance. That is why your IMPACT Employee Assistance & Work/Life Program created the *Quit Center* to help you (or a significant other) quickly identify the resources, tools and professional help needed to help you reach your goal.
